Transoft Solutions Secures Significant Sale with Genivar

Genivar purchases considerable amount of licenses of AutoTURN, GuidSIGN, ParkCAD, and TORUS

FOR IMMEDIATE RELEASE
April 15, 2009 – Vancouver, BC, Canada

Transoft Solutions, developers of industry leading software for the transportation architectural engineering communities, has recently secured a significant sale with Genivar, a major Canadian based engineering company. With more than 45 years of experience, 3,500 employees in 85 offices, and projects in over 35 countries, Genivar is a leader in providing consulting engineering services. With the fast growth of the company and expansion into multiple areas of engineering, Genivar has acquired a substantial amount of licenses for AutoTURN, GuidSIGN, ParkCAD, and TORUS to consolidate and offer proper network deployment across all of their offices.

Throughout the years, Genivar has been experiencing substantial growth through the purchase of many organizations across Canada and the Caribbean. These organizations focus on different areas of engineering, therefore incorporating varying Transoft Solutions product licenses. To consolidate each license and set up proper networking systems across all offices, Genivar turned to Transoft Solutions.

With an extensive audit to determine transportation engineering software needs, Genivar had purchased licenses for AutoTURN, GuidSIGN, ParkCAD, and TORUS, all of which are fully compatible with AutoCAD® 2004 - 2009 and MicroStation® V8.1 – XM. Using advanced vehicle swept path and turn simulations, and loaded with numerous features, AutoTURN will allow Genivar to easily evaluate and analyze complex vehicle maneuvers for future projects. Using the AutoTURN engine, TORUS will allow them to generate single and multilane roundabout geometry using vehicle swept paths in real-time. ParkCAD will eliminate the task of calculating and drafting; automatically creating parking sites using a real time display. GuidSIGN, now updated with Canadian MUTCDC, will provide Genivar with the tools to quickly and easily create cutter ready highway signs.

Working together since 1999, Genivar has become one of Transoft Solutions major Canadian client using both French and English versions of AutoTURN and ParkCAD software. Renée Dow, Sales Associate for the Quebec region said of the purchase, “the sale was made possible due to the ongoing efforts put forth from our sales team since 2006 and from the participation of Genivar’s Information Technology Manager, Réjean Lessard.”
